Projects

Item Catalog - *cataloginator.herokuapp.com*   *April 2016*
- A fully responsive web application for creating, reading, updating, and deleting items in a catalog
- Built with the Python framework Flask and backed by a PostgreSQL database
- Features user authentication and authorization with both Google and Facebook accounts

PubMed Browser - *pubmeddler.herokuapp.com*   *Mar 2015*
- A web application for querying, researching, and taking notes on PubMed.gov articles
- Built with Ruby on Rails and backed by a PostgreSQL database
- Deployed via Git to a Heroku cloud server

Experience

Accenture – *Business & Systems Integration Analyst* | Seattle, WA   *August 2015 – May 2016*
Costco – Release 3 SAP Finance
- Helped organize and lead a complex daily data load process
- Led daily defect triage and status report meetings in a client facing role
- Created excel macros to reduce 4 hours of daily inventory reconciliation to 30 minutes

Neudesic – *Amerishore Associate Consultant* | Houston, TX   *April 2014 – Mar 2015*
E-470 Public Highway Authority – Application Redevelopment
- Led a three-man Agile team of QA testers during an upgrade to SharePoint 2013
- Identified and tested over 100 active defects to ensure a strong mobile first user experience
- Gathered requirements for new features and wrote corresponding user stories
E-470 Public Highway Authority – Report Mass Update
- Led an Agile team of junior developers in updating and testing more than 200 SSRS reports
- Provided a functional requirements document of each report to client/stakeholders
- Parameterized reports to increase their flexibility with future roadways and agencies

Activities

University of Houston - Management Information Systems Student Organization (MISSO)
